

## SELECTED WORLD REGIONS

The map of selected world regions is reproduced here to help students and their teachers familiarize themselves with some of the commonly used regional terms in the study of world history. It is not a complete map of world regions but includes areas that students most often misidentify in their AP World History essays.

Cultural areas that have changed often over time, such as eastern and western Europe and Central Asia, cannot be indicated accurately here and should be discussed in the classroom. The map does not indicate geographical locations such as continents, which students are expected to learn in class.

 North Africa

 West Africa

 East Africa

 Equatorial Africa

 Southern Africa

 Middle East

 East Asia

 Southeast Asia

 Latin America

 South Asia
